

DART Orange Line to North Irving/DFW

Lake Carolyn Parkway

Construction Update

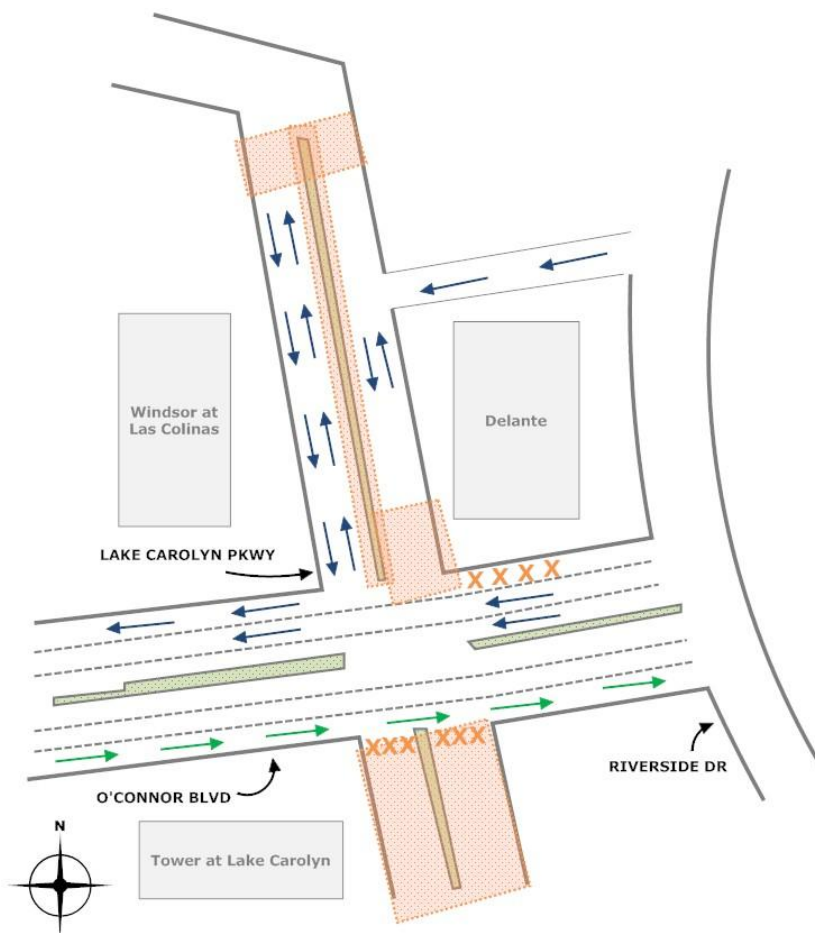

The DART Orange Line construction is quickly moving along the corridor and continues to progress through the Lake Carolyn Pkwy area. In an attempt to minimize impacts, weekly construction updates are emailed out. This helps provide a more definitive answer to many construction questions, and provides notice to areas that may experience upcoming traffic delays or construction activity.

You can register for Orange Line Construction Updates online at www.dart.org.

These lane restrictions are needed to provide a safe work area as crews continue station and crossing work. As construction proceeds over the next couple of years, additional lane restrictions and configuration changes will be needed to accommodate other construction activities. Signage will be present to direct motorists.

The following configuration of Lake Carolyn Pkwy is scheduled to remain in place for 3-5 weeks to provide a safe work area for crews so continue station, track, and crossing operations.

Please note that all dates are tentative as they do not account for weather delays or other schedule impacts.

At a minimum, one lane of traffic will be maintained in each direction, and access to residential and business drives will remain open.

For the safety of everyone, pedestrian and cycle traffic are not permitted in construction zones. Please use alternate routes.

Please use caution when traveling through construction zones, observe any changes to speed limits or detours. Motorists are not permitted to drive or park inside construction zones.
